

~Growing Uptown —your Grow Kit Instructions

Follow these simple instructions, and you'll have a successful veggie~herb garden in no time! Please, follow us on social media and our website dyckmanfarmhouse.org/programs/growing-uptown for video instructions and recipes!

1 Seed starter.

A three-part seed-starter container; this is where the magic happens!

2 Bottom part container.

To hold the water when you water your seeds and hold space for the plant roots to breathe.

3 Second container layer.

The container holds the soil and seeds; the holes are to allow the drainage of water.

4 Temperature control.

Lid with the temperature control wheel. Spin the wheel to allow air through one or all orifices.

5 Five types of seeds.

We include rosemary, beets, basil, cilantro, and onion seeds.

6 Planting from seed.

Use the scoop-trowel to add potting soil to the container.

7 Create seed holes.

Use your finger to poke a half an inch hole in the soil.

8 Seed starter ready.

The seed-starter container is ready to add seeds.

Follow these simple instructions, and you'll have a successful veggie~herb garden in no time! Please, follow us on social media and our website dyckmanfarmhouse.org/programs/growing-uptown for video instructions and recipes!

9 Add your seeds.

Add three to five seeds per hole.

10 Seed starter ready.

Gently cover the seeds with soil; keep the soil fluffy.

11 Water your seeds.

Gently, use a mist spray water bottle to wet the soil.

12 Label your seed tags.

Use a permanent marker to label your seeds.

13 Install your light.

Clamp the grow light on a surface, preferably next to a window.

14 Plug it and turn it on.

Press the power button; it will lit a red light around the button. A blue light indicates the light is off.

15 Light levels and timer.

Set the top button to the brightest level; there are nine settings. The second button to set the lights on red. The third button, to 12 hours.

16 Ready!

Let light and moist do the job; you should start seeing plant growth six to eight days later.

Follow these simple instructions, and you'll have a successful veggie~herb garden in no time! Please, follow us on social media and our website dyckmanfarmhouse.org/programs/growing-uptown for video instructions and recipes!

1 Grow bag starter.

Gather your Grow bag, soil, and the scoop trowel to start. The 7-gallon bag is meant for onions and beets; the 2-gallon bag for herbs.

2 Fill in your Grow bag.

Use the scoop-trowel to add potting soil to the Grow bag. Fill it in 6-inches to the top, and fold in the last inch.

3 Poke holes to plant.

Planting layout to grow your onions and herbs. Poke one middle-hole for beets 3/4 of an inch deep.

4 Your seeds.

From left to right, basil, rosemary, cilantro, onion, and beet seeds.

5 Seeds in the soil!

Gently, place a few seeds in the hole.

6 Cover your seeds.

Gently cover your seeds with soil using your index finger.

7 Water your seeds.

Use a mist water spray or a bottle with a narrow mouth to water the soil gently. Water daily.

8 Place by sunlight.

Place your Grow bag near a window or in your firescape.
